## Profile:

Industrious web developer, able to work autonomously, or in a team environment. Highly adaptive, absorbant, self-starter skilled in developing **jQuery**, and **Actionscript** web applications. Proficient under deadlines with distinctive problem solving abilities, and excellent leadership and tutoring skills.

## Strengths and Skills:

- HTML, CSS, Javascript (Ajax)
- Javascript Libraries (jQuery, Prototype)
- Flash Applications using Actionscript 3.0
- Java (jsp, servlets, storesonline platform)
- PHP (wordpress)
- SEO, CRO, Google Analytics
- Adobe Creative Suite
- Cross-browser friendly coding
- User Interface (UI) / User eXperience (UX)

## Web Development Qualifications:

- **Javascript** – Developed web applications using clean, well commented, maintainable code (Including Libraries: **JQuery**, Prototype, etc. )
- **HTML & CSS** - High familiarity with the latest standards (HTML 5 / CSS3) as well as best practices for keeping older browsers in check.
- **Google Code API** - Integration with Google analytics, including advanced event tracking, and Google's 'visualization' API
- **Java (JSP,Servlets), PHP** - Created templates for more than 40 Storesonline client websites, moderate PHP experience.
- **Adobe Creative Suite** - Experienced in taking projects through design and development using Adobe's products (Photoshop, Flash, Dreamweaver, etc)

## Design, Animation, User Interface Experience:

- Designed and developed unique dynamically generated user interfaces (**AJAX**) for eCommerce, and lead-gen websites.
  - Including: written specifications, flow charts, wireframes, and storyboarding
  - Examples include: Custom search tools, product variation selectors, slideshows, custom navigation, etc.
- Customized Animation, and UI using **Actionscript 3.0**
- Integrated with Google 'visualization' API for interactive charts and maps.
